Chapter 1

Flow

The following standalones are available:

- *PythonEnvironment* – defines what executables to use, system-wide or specific ones (e.g., from a virtual environment).

The following sources are available:

- *PythonExec* – executes the specified Python script.
- *PipExec* – executes pip.

The following transformers are available:

- *PythonExpandScript* – expands variables and placeholders in a script template and saves it as a separate file.

Bibliography

- [1] *ADAMS* – Advanced Data mining and Machine learning System
<https://adams.cms.waikato.ac.nz/>
- [2] *Python* – a programming language that lets you work more quickly and integrate your systems more effectively.
